Nancy and Matt,

Here are the actions that need to occur.

1. Put in redirects related to CC
2. Re start apache web servers one at a time
3. Test some important CC related URLs

Once the global redirect is in place (1), the CC site will no longer be findable to the public and instead the visitors will go to

<https://www.epa.gov/sites/production/files/signpost/cc.html>

But we have a bit of a circle here—the custom page is supposed to link to the press release, and the press release has to be published for that link to work.

So Nancy do you want us to add the press release link AFTER the press release is live to the custom page?

FOR IMMEDIATE RELEASE
April 28, 2017

EPA Kicks Off Website Updates

WASHINGTON – EPA.gov, the webpage for the United States Environmental Protection Agency, is undergoing changes that reflect the agency's new direction under President Donald Trump and Administrator Scott Pruitt. The announcement of the process, which involves updating language to reflect the policy preferences of the new administration, is in recognition of the importance of the information on the website. The changes will comply with agency ethics and legal guidance, including the use of proper archiving procedures. For instance, a screenshot of the last administration's website will remain available from the main page as required by law.

"As EPA renews its commitment to human health and clean air, land, and water, our website needs to reflect the views of the leadership of the agency," said J.P. Freire, Associate Administrator for Public Affairs. "We want to eliminate confusion by removing outdated language first and making room to discuss how we're protecting the environment and human health by partnering with states and working within the law."

The first page to be updated is a page reflecting President Trump's Executive Order on Energy Independence, which calls for a review of the so-called Clean Power Plan. Language associated with the Clean Power Plan, written by the last administration, is out-of-date. Similarly, content related to climate and regulation is also being reviewed.

Matthew, Harvey, Steven,

Thanks for your help on taking care of the website.

I realized that this one also needs to be updated.

If we could just have it redirect here, that would be great:

Steve, Harvey and Matt,

As discussed with Nancy, we would like the content at the links below removed and archived as soon as possible.

The removed climate change pages will be replaced with a custom page that will explain why the change is happening, include a link to the January 19, 2017 snapshot of the EPA website, and a link to the press release we'll be putting out.

The clean power plan pages will be redirected to the newly posted energy independence pages.

We appreciate your assistance in this time-sensitive matter.

Please let us know if you have questions.

Thank you

Hi there –

So we have this now – just wondering how we should coordinate timing – as we need to send the press release once everything is done and then that link needs to go in the custom 404 notice.

Do we have a sense of timing?

Thanks much

Subject: GEORGE REVIEW: OAR web page update
Radiation Resources Outside EPA-Compare Sections.docx

Hi George,

We should probably talk about this on Wednesday.

OAR wants to make some updates to this page: <https://www.epa.gov/radiation/radiation-information-other-agencies>

They have mocked up what they want the new page to look like here:
<https://wcms.epa.gov/node/62985/revisions/517249/view>

There are two reasons for the change:

1. The current title is not descriptive enough to help users.
2. They have been still getting too many public questions about matters not pertinent to EPA: cell phones, power lines, etc. This new content is intended to quickly point users to the appropriate federal agency while emphasizing that these topics are not EPA's role.

As part of the change they are removing the tabs from the site and rearranging the content to be easier to read & putting the visual charts on the webpage itself, not burying them in the PDF reports. (This is all good for user ease of understanding the information.)

They are also adding a little bit of content & doing some re-writing of content.

Attached is a summary of the changes they are planning (what's currently there content-wise & what they propose).

Hi!

RPD would like to replace this webpage:

<https://www.epa.gov/radiation/radiation-information-other-agencies>

with this page:

There are two reasons for the change:

The major changes are formatting (removal of tabs) but there are sufficient edits that I thought you should check it out first before I give them the go-ahead to make it live.

EPA Kicks Off Website Updates

WASHINGTON – EPA.gov, the webpage for the United States Environmental Protection Agency, is undergoing changes that reflect the agency's new direction under President Donald Trump and Administrator Scott Pruitt. The process, which involves updating language to reflect the approach of new leadership, is intended to ensure that the public can use the website to understand the agency's current efforts. The changes will comply with agency ethics and legal guidance, including the use of proper archiving procedures. For instance, a screenshot of the last administration's website will remain available from the main page.

"As EPA renews its commitment to human health and clean air, land, and water, our website needs to reflect the views of the leadership of the agency," said J.P. Freire, Associate Administrator for Public Affairs. "We want to eliminate confusion by removing outdated language first and making room to discuss how we're protecting the environment and human health by partnering with states and working within the law."

The first page to be updated is a page reflecting President Trump's Executive Order on Energy Independence, which calls for a review of the so-called Clean Power Plan. Language associated with the Clean Power Plan, written by the last administration, is out-of-date. Similarly, content related to climate and regulation is also under review.

Also, per JP, Clean Power Plan should not get a 404 page, rather should re-direct to the energy independence pages that he says are ready to go.

We can try to send the other site somewhere else, but that is hard to get right.

Hi Christine – Please see the note below. We're trying to take ownership of this site. We'd like Katherine Stevens on my team to be EIC and to get the contact us e-mails to the right box. Do you have any further assistance to offer?

My understanding was that OPA/OWC would direct the contact us e-mails to energy-independence@epa.gov .

Then we learned that that did not happen and that, instead, I was named EIC and expected to make that change. Happy to do that, Andrea followed the instructions provided, only to come full circle.

Thanks –

John

Hi Kati -- I don't think there are any show stoppers here, but if you could send this around to the OAR EIC list for their awareness and input (if they'd like) that would be good.

You may want to familiarize yourself with this stuff, too.

Again, this is more of a "house style" than a treatise on what's right and wrong for the web. Overall good practices for a govt website, though.

Subject: Updated Web Standards

The Web Council approved the updates of standards on Wednesday July 12. The updated standards are the PDF Links Standard, the Writing for the Web Standard and the Javascript standard. When you're preparing a web site for www.epa.gov, all the standards matter though they may not all apply to the site you're working on.

<https://www.epa.gov/web-policies-and-procedures/web-standard-writing-web>

<https://www.epa.gov/web-policies-and-procedures/web-standard-pdf-links>

<https://www.epa.gov/web-policies-and-procedures/web-standard-javascript>

New site content has to be reviewed by OWC. I recommend reading the Writing for the Web standard and the Successfully Preparing Your Content for OWC review (a link on the Writing for the Web standard). Writing for the web is a skill that a lot of us don't have and need to practice. This was a huge rewrite combining information from several places into one place.

The PDF Links standard shows how to make a PDF link. The standard was incorporated into the WebCMS so it seems automatic but the standard came first. There are many places that we still write links to PDFs. Just checking, did you know you should be following the PDF link standard when you link to PDFs on web sites other than www.epa.gov?

The updates to the Javascript standard strengthened the "Accessibility" portion, while also making it clearer that JS isn't prohibited.

John – Tomorrow is the Web Council’s deadline for our making their requested format changes (no content) to sections of our website, as part of the SOP for such things post-Drupal conversion.

As you know these types of change requests happen fairly regularly.

We understand that content changes need prior approval and such requests, for the moment, would be routed through Judy to you, etc.

Are you OK with our satisfying the Web Council’s direction on format changes?

Thanks

Subject: Web guidance draft

I wanted to send this out to the OAR Web EICs list, if you think it's a good idea.

Good afternoon!

For those of you who don't know me, my name is Kati Stevens, and I am OAR's Web Council person. Since I have received some requests for timelines on web updates, new pages, and areas recently, I figured I would inform the group as much about the process as it currently stands as possible.

1. For new web areas, this page really spells out the process:
<https://www.epa.gov/webguide/step-step-guide-eics-developing-and-maintaining-web-content#approved>. It takes time.
2. For new web pages or updating pages that involves brand-spanking-new information or other drastic changes, the average time from me approving the pages (usually less than a day) to OPA granting final approval, at this time, is two weeks (sometimes less, sometimes more). Please keep this in mind as a general rule and work it into your plans and expectation setting.
3. For regular maintenance or updating pages in such a way as to add material that can be found elsewhere on EPA, notifying me or John is usually sufficient.

If you aren't sure whether your update is a #2 or a #3, or if you have any other questions, feel

free to email or call. For your office's presence of mind, please keep the two weeks in the back of your minds when you're preparing new materials, pages, or areas as a minimum.

Best,

Kati

Hi Kati -- I don't think there are any show stoppers here, but if you could send this around to the OAR EIC list for their awareness and input (if they'd like) that would be good.

You may want to familiarize yourself with this stuff, too.

Again, this is more of a "house style" than a treatise on what's right and wrong for the web. Overall good practices for a govt website, though.

Thanks!

Ok. We'll those redirected.

I want to make sure I understand about the speeches page, if I proceed as the others, we'll move that page to Archive, we could at some future date, build a new page for Administrator Pruitt's speeches.

This new speeches page is what the intern would populate. By the way, as an aside, a fed or contractor needs to publish the pages when the new ones get built. Interns can't publish to the site.

Our directions have not been entirely clear, so is this the exact request:

1. Add some Spanish language content and a News Release link to <https://www.epa.gov/sites/production/files/signpost/cc.html>
2. Purge the cache and re-publish that page
3. Take the following .html pages and redirect the URLs to the above signpost page:

Main Spanish climate change page:

<https://espanol.epa.gov/espanol/el-cambio-climatico-y-usted>

Climate change FAQs:

<https://espanol.epa.gov/espanol/datos-sobre-el-cambio-climatico-respuestas-las-preguntas-mas-frecuentes>

archived pages; <https://www.epa.gov/sites/production/files/signpost/cc.html>

And OEI may proceed to archive these pages shortly after that.

I believe that by 3:30 at the very latest the archiving process may begin.

Our directions have not been entirely clear, so is this the exact request:

1. Add some Spanish language content and a News Release link to <https://www.epa.gov/sites/production/files/signpost/cc.html>
2. Purge the cache and re-publish that page
3. Take the following .html pages and redirect the URLs to the above signpost page:

Main Spanish climate change page:

<https://espanol.epa.gov/espanol/el-cambio-climatico-y-usted>

Climate change FAQs:

<https://espanol.epa.gov/espanol/datos-sobre-el-cambio-climatico-respuestas-las-preguntas-mas-frecuentes>

And OEI may proceed to archive these pages shortly after that.

I believe that by 3:30 at the very latest the archiving process may begin.

Our directions have not been entirely clear, so is this the exact request:

1. Add some Spanish language content and a News Release link to <https://www.epa.gov/sites/production/files/signpost/cc.html>
2. Purge the cache and re-publish that page
3. Take the following .html pages and redirect the URLs to the above signpost page:

Main Spanish climate change page:

<https://espanol.epa.gov/espanol/el-cambio-climatico-y-usted>

Climate change FAQs:

<https://espanol.epa.gov/espanol/datos-sobre-el-cambio-climatico-respuestas-las-preguntas-mas-frecuentes>

As soon as I publish the Spanish PR, I'll translate the Spanish text that will appear on archived pages; <https://www.epa.gov/sites/production/files/signpost/cc.html>

And OEI may proceed to archive these pages shortly after that.

I believe that by 3:30 at the very latest the archiving process may begin.

“The only thing that I still need to look at if some of those PDFs have PDF pages.”

I don't know what that means.

But I did check that the 8 pdfs listed on the list are all linked to from the one page on the archive list.

Our directions have not been entirely clear, so is this the exact request:

1. Add some Spanish language content and a News Release link to <https://www.epa.gov/sites/production/files/signpost/cc.html>
2. Purge the cache and re-publish that page
3. Take the following .html pages and redirect the URLs to the above signpost page:

Main Spanish climate change page:

<https://espanol.epa.gov/espanol/el-cambio-climatico-y-usted>

Climate change FAQs:

<https://espanol.epa.gov/espanol/datos-sobre-el-cambio-climatico-respuestas-las-preguntas-mas-frecuentes>

As soon as I publish the Spanish PR, I'll translate the Spanish text that will appear on archived pages; <https://www.epa.gov/sites/production/files/signpost/cc.html>

And OEI may proceed to archive these pages shortly after that.

I believe that by 3:30 at the very latest the archiving process may begin.

Our directions have not been entirely clear, so is this the exact request:

1. Add some Spanish language content and a News Release link to <https://www.epa.gov/sites/production/files/signpost/cc.html>
2. Purge the cache and re-publish that page
3. Take the following .html pages and redirect the URLs to the above signpost page:

Main Spanish climate change page:

<https://espanol.epa.gov/espanol/el-cambio-climatico-y-usted>

Climate change FAQs:

Re: Speeches:

Talking to Christine, we think taking all previous Admin speeches and archiving them is the best approach vs the entire area. We'll put a placeholder sentence up there for Admin Pruitt till we get some content.

Right now, all speeches prior to 2014 are in the archive, we'll just archive through 2016. Do we in OWC have the proper rights to archive that content?

Ok. We'll those redirected.

I want to make sure I understand about the speeches page, if I proceed as the others, we'll move that page to Archive, we could at some future date, build a new page for Administrator Pruitt's speeches.

This new speeches page is what the intern would populate. By the way, as an aside, a fed or contractor needs to publish the pages when the new ones get built. Interns can't publish to the site.

I recognize the latter means we'll have to update this with text of SP's speeches.  
I'm hoping to have an intern take care of that soon.

Ok. We'll those redirected.

I want to make sure I understand about the speeches page, if I proceed as the others, we'll move that page to Archive, we could at some future date, build a new page for Administrator Pruitt's speeches.

This new speeches page is what the intern would populate. By the way, as an aside, a fed or contractor needs to publish the pages when the new ones get built. Interns can't publish to the site.

I want to make sure I understand about the speeches page, if I proceed as the others, we'll move that page to Archive, we could at some future date, build a new page for Administrator Pruitt's speeches.

This new speeches page is what the intern would populate. By the way, as an aside, a

fed or contractor needs to publish the pages when the new ones get built. Interns can't publish to the site.

Actually Mike says he thinks you can only archive for the web areas you belong to.

But we can add you to any web area you need access to archive.

Talking to Christine, we think taking all previous Admin speeches and archiving them is the best approach vs the entire area. We'll put a placeholder sentence up there for Admin Pruitt till we get some content.

Right now, all speeches prior to 2014 are in the archive, we'll just archive through 2016. Do we in OWC have the proper rights to archive that content?

“The only thing that I still need to look at if some of those PDFs have PDF pages.”

I don't know what that means.

But I did check that the 8 pdfs listed on the list are all linked to from the one page on the archive list.

As soon as I publish the Spanish PR, I'll translate the Spanish text that will appear on archived pages; <https://www.epa.gov/sites/production/files/signpost/cc.html>

And OEI may proceed to archive these pages shortly after that.

I believe that by 3:30 at the very latest the archiving process may begin.

Lina and Danny,

Please look at this page and review/approve.

<https://drupal3.epa.gov/sites/production/files/signpost/cc.html>

Then John will purge it from Akamai.

Then we will redirect the Espanol pages to it.

As soon as I publish the Spanish PR, I'll translate the Spanish text that will appear on archived pages; <https://www.epa.gov/sites/production/files/signpost/cc.html>

And OEI may proceed to archive these pages shortly after that.

I believe that by 3:30 at the very latest the archiving process may begin.

So, the only thing I owe you is the Spanish that you are going to add to the English pages. I'll be translating that shortly.

Yes, Susan

That is accurate. The only thing that I still need to look at if some of those PDFs have PDF pages. Give me 20 minutes to check that.

I don't know what that means.

But I did check that the 8 pdfs listed on the list are all linked to from the one page on the archive list.

As soon as I publish the Spanish PR, I'll translate the Spanish text that will appear on archived pages; <https://www.epa.gov/sites/production/files/signpost/cc.html>

And OEI may proceed to archive these pages shortly after that.

I believe that by 3:30 at the very latest the archiving process may begin.

WASHINGTON – EPA.gov, the website for the United States Environmental Protection Agency, is updating the agency's new direction under President Donald Trump and Administrator Scott Pruitt. The process, which reflect the approach of new leadership, is intended to ensure that the public can use the website to stay informed of the agency's efforts. The changes will comply with agency ethics and legal guidance, including the use of proper language. A screenshot of the last administration's website will remain available from the main page.

"As EPA renews its commitment to human health and clean air, land, and water, our website needs to reflect the agency's new direction," said J.P. Freire, Associate Administrator for Public Affairs. "We want to eliminate confusion and make room to discuss how we're protecting the environment and human health by partnering with the public and the law."

The first page to be updated is a [page reflecting President Trump's Executive Order on Energy and the Environment](#), also called Clean Power Plan. Language associated with the Clean Power Plan, written by the last administration, and content related to climate and regulation is also being reviewed.

**WASHINGTON** - EPA.gov, the webpage of the U.S. Environmental Protection Agency, is set to undergo a major redesign to reflect the agency's new direction under President Donald Trump. The changes will comply with agency guidelines to ensure the website reflects the administration's policies and priorities. The redesign of the last administration's website was completed in 2017.

"As EPA renews its commitment to humankind, we will continue to work with the agency," said J.P. Freire, Associate Attorney General, "and making room to discuss how we can best protect the environment and the law."

WASHINGTON – EPA.gov, the website for the United States Environmental Protection Agency, is undergoing changes that reflect the agency's new direction under President Donald Trump and Administrator Scott Pruitt. The process, which involves updating language to reflect the approach of new leadership, is intended to ensure that the public can use the website to understand the agency's current efforts. The changes will comply with agency ethics and legal guidance, including the use of proper archiving procedures. For instance, a screenshot of the last administration's website will remain available from the main page.

“As EPA renews its commitment to human health and clean air, land, and water, our website needs to reflect the views of the leadership of the agency,” said J.P. Freire, Associate Administrator for Public Affairs. “We want to eliminate confusion by removing outdated language first and making room to discuss how we’re protecting the environment and human health by partnering with states and working within the law.”

The first page to be updated is a [page reflecting President Trump's Executive Order on Energy Independence](#), which calls for a review of the so-called Clean Power Plan. Language associated with the Clean Power Plan, written by the last administration, is out of date. Similarly, content related to climate and regulation is also being reviewed.

Talking to Christine, we think taking all previous Admin speeches and archiving them is the best approach vs the entire area. We'll put a placeholder sentence up there for Admin Pruitt till we get some content.

Right now, all speeches prior to 2014 are in the archive, we'll just archive through 2016. Do we in OWC have the proper rights to archive that content?

I want to make sure I understand about the speeches page, if I proceed as the others, we'll move that page to Archive, we could at some future date, build a new page for Administrator Pruitt's speeches.

This new speeches page is what the intern would populate. By the way, as an aside, a fed or contractor needs to publish the pages when the new ones get built. Interns can't publish to the site.

This new speeches page is what the intern would populate. By the way, as an aside, a fed or contractor needs to publish the pages when the new ones get built. Interns can't publish to the site.

I recognize the latter means we'll have to update this with text of SP's speeches. I'm hoping to have an intern take care of that soon.

This thread provides a little more context. Instead of my previous email where I looked for titles with “greenhouse gas”, this time I did a search on endangerment in the Climate Change web area. It returned the pages listed in the attached image.

Andrea, if you put those pages : <https://www.epa.gov/climatechange/endangerment-and-cause-or-contribute-findings-greenhouse-gases-under-section-202a>

Into the searchable collection or a different web area vs inside /climatechange, OEI won't have to figure out a workaround. Can you do that ?

Endangerment pages need to stay – so we need to find a way to isolate them

Also, per JP, Clean Power Plan should not get a 404 page, rather should re-direct to the energy independence pages that he says are ready to go.

If we do an Apache based global redirect, everything in the path of these 3 sites will go the same place.

/cleanpowerplan  
/cleanpowerplanttoolbox  
  
/climatechange

We can try to send the other site somewhere else, but that is hard to get right.

Susan, the endangerment is here:

<https://www.epa.gov/climatechange/endangerment-and-cause-or-contribute-findings-greenhouse-gases-under-section-202a>

since it's housed inside /climatechange will that be a hurdle for implementing the custom 404?

Danny,

Susan asked me to send a list of greenhouse gas pages in the Climate Change Web area to this distribution list. See the attached images.

Andrea, if you put those pages : <https://www.epa.gov/climatechange/endangerment-and-cause-or-contribute-findings-greenhouse-gases-under-section-202a>

Into the searchable collection or a different web area vs inside /climatechange, OEI won't have to figure out a workaround. Can you do that ?

Endangerment pages need to stay – so we need to find a way to isolate them

Also, per JP, Clean Power Plan should not get a 404 page, rather should re-direct to the energy independence pages that he says are ready to go.

Thanks ng

If we do an Apache based global redirect, everything in the path of these 3 sites will go the same place.

/cleanpowerplan  
/cleanpowerplantoolbox

/climatechange

We can try to send the other site somewhere else, but that is hard to get right.

Susan, the endangerment is here:

<https://www.epa.gov/climatechange/endangerment-and-cause-or-contribute-findings-greenhouse-gases-under-section-202a>

since it's housed inside /climatechange will that be a hurdle for implementing the custom 404?

Andrea, if you put those pages : <https://www.epa.gov/climatechange/endangerment-and-cause-or-contribute-findings-greenhouse-gases-under-section-202a>

Into the searchable collection or a different web area vs inside /climatechange, OEI won't have to figure out a workaround. Can you do that ?

- 2) Can we put the attached banner on the right side of the page where it currently has the Administrator's quote "I seek to listen..."? FYI we'll be unveiling this graphic on social media at 9am.

I'd like to get the website changes by COB today if possible. Thank you!

Hi- Hope things are going well in D.C. I was hoping now was a good time to test the waters with some minor/low impact webpage updates. Please see the attached spreadsheet that has current and revised page IDs for our Estuary Data Mapper website. (I couldn't get the link to work directly, but if I went into "edit link," and cut and pasted into a browser, it works).

Please let us know what format you need this information in, and if there are any questions.

Also- do you have an estimate of the time the new process will take? We have a larger request for an update coming soon.

Thank you for your assistance,

Heidi

Heidi – Not quite sure how to proceed, so let's start this way...

Attached is a little spreadsheet with a link to the currently published page, a link to a version that's updated but unpublished, and a brief summary of what's different.

We need Web Comms to tell us it's OK to publish the updated pages.

I am assuming they can access these links so they can review the updates themselves. If they need more info, I can provide it.

Questions? Comments?

The Estuary Data Mapper is a geospatial app that allows researchers to zoom into a specific estuary of interest and find current, available data, from many sources. It provides info about tidal, hydrologic, weather, water quality, and sediment quality. You have to download it; it's not cloud-based.

What they are doing now is adding two more data sources to it -- data from National Atmospheric Deposition Program (NADP) and the Community Multi-scale Air Quality (CMAQ). There are a lot of other EPA databases that also pull from these sources.

NADP is a cooperative effort between many different groups, including federal, state, tribal and local governmental agencies, educational institutions, private companies, and non-governmental agencies.

CMAQ is an EPA effort. Learn more here: <https://www.epa.gov/air-research/community-multi-scale-air-quality-cmaq-modeling-system-air-quality-management>

I don't know if these are significant or small updates -- it's just two more data sets. These data sets are already on the web. The Estuary Mapper already pulls from a TON of other datasets: <https://www.epa.gov/air-research/community-multi-scale-air-quality-cmaq-modeling-system-air-quality-management> .

I see a few things I'd like to fix on the site -- stuff like linking to pages in the archive, and aligning the images on their home page <https://www.epa.gov/hesc> . Minor minor stuff.
